(925) 240-3826 Claremont, CA 91711

EDUCATION Harvey Mudd College, Claremont, CA Expected Graduation: May 2019

B.S. in Mathematics and Computer Science GPA: 3.7 (Dean's List)

The College Preparatory School, Oakland, CA Graduated: May 2015

Programming Expert Proficient Knowledgeable

LANGUAGES Python, Coconut Haskell, C++, JavaScript, CoffeeScript, MATLAB R, Java, Mathematica

Summary Three summers of professional software engineering experience, one at Yelp and two at Ripple. Created two major open-source projects, the Coconut programming language and Undebt, which together have over 2,000

stars on GitHub. Dean's list student majoring in mathematics and computer science at Harvey Mudd College.

WORK Computer Science Grader and Tutor
EXPERIENCE Harvey Mudd College, Claremont, CA

• Currently grading and tutoring for Principles and Practices of Computer Science.

• Previously graded and tutored for Computer Science for Insight.

Software Engineering Intern Yelp, San Francisco, CA June - August 2016

• Primary author of Undebt, an open-source static code analysis tool for massive automated code refactoring with over 1,300 stars on GitHub.

• Wrote a blog post on Undebt (link below), which proved to be Yelp's most popular blog post to date and was featured on the front page of Hacker News.

- Fixed errors in Yelp's configuration management that had previously taken down yelp.com multiple times.
- Rewrote Yelp's system for running large batch data processing operations with EMR.

Software Engineering Intern Ripple, San Francisco, CA June - August 2014; June - August 2015

January - May 2016; September 2016 - Present

- Worked on designing Interledger, a trustless system for cross-currency transactions between arbitrary agents.
- Wrote a tool to do cryptographically secure generation of wallets for financial institutions.
- Developed a program to manage Ripple's GitHub infrastructure.

Personal Projects

The Coconut Programming Language

October 2014 - Present

ROJECTS http://coconut-lang.org

Created the Coconut programming language, a novel functional programming language that compiles to Python. Coconut has been viewed over 35,000 times, has collected over 700 stars on GitHub, has been shown on the front page of Hacker News, r/Python, and r/Programming, has been featured on InfoWorld.com and Pointer.io, and has a regular, dedicated 45-person meetup in NYC. See Coconut's website (link above) for more information.

DeTeXiPi October 2015

Hackathon project to load DeTeXify onto a Raspberry Pi and connect it to a computer as a keyboard that types out LaTeX commands for drawn symbols.

Discrete Wavelet Transform Steganography

April - May 2015

https://github.com/evhub/steganography

Developed a program to perform image steganography using the discrete wavelet transform method. Written in Coconut.

Iterated Recursive Prisoner's Dilemma Simulator

April 2015

https://github.com/evhub/prisoner

Developed a library for performing and competing in iterated prisoner's dilemma competitions in which the competing programs can simulate the opposing programs. Written in Coconut.

The Rabbit Programming Language

April - December 2014

https://github.com/evhub/rabbit

Created the Rabbit Programming Language, a purely functional, interpreted, dynamically-typed scripting language built on top of universal Python for full interoperability. Wrote a technical paper describing the language, which can be found on GitHub.

OPEN SOURCE CONTRIBU-

TIONS

The Python Programming Language Minor unittest and documentation improvements.

Jupyter (IPython) Fixed an issue that broke custom syntax highlighting.

Python Typeshed Added type annotations for standard library module future_builtins.

StaticConf Improved resiliency in the event of missing data.

PyParsing Fixed numerous issues including Unicode support and PyPy compatibility.

RippleD Significant improvements to the compilation/build process. **Codius** Minor improvements to Python sandboxing and documentation.
